Guide to Implementing Successful LDCT Lung Cancer Screening Programs: for Healthcare Providers in Navigating the Path Towards Population Health

Based on 2016 Research with Established Programs

Table of Contents

Background and Research Objectives
• Navigating the path to Population Health
• Timeline of Events Impacting LDCT
• Patient eligibility criteria
• Facility eligibility criteria
• Research Methodology
• Demographic Profile of Research Participants
• Map of Participating Facilities and Lung Cancer Incidence

Overview of LDCT Lung Cancer Screening Programs at Participating Sites
• When LDCT Lung Cancer Screening Programs were implemented
• Number of Cases Conducted by Years of Experience
• Current Monthly Case Load by facility type
• Anticipated Monthly Case Load for 2016 and 2017 by facility type
• Monthly Case Load by number of locations

Program Objectives and Success to Date
• Program’s broad strategic objectives
• Tactical objectives of the program
• Most positive results
• Imaging administrator’s perspective on success
• Self-Assessed success to date

Guide to Implementing a Successful Program
• Recommendations for success
• Ideal LDCT lung cancer screening program journey
• How to develop workflow and supporting infrastructure
• How to develop screening protocols & standardized reporting
• How to setup & submit data to CMS-approved registry
• Qualities of a program champion
• How to establish a multidisciplinary team
• How to communicate and educate referring physicians
• How to identify and attract patients
• How to develop the marketing & public education strategy
• How to implement smoking cessation counseling & shared decision making visits
• How to seek ACR lung cancer screening center designation
• How to research the program elements

Case Studies
• Large Urban Hospital in the Midwest
• Small Rural Hospital in the West
• Multispecialty Clinic in a Small Southern City
• A Suburban Radiology Imaging Center in the South
